What is BESTMIX® ERP Suite?

BESTMIX® ERP Suite is an industry-specific, complete and standalone enterprise resource planning solution that has Microsoft Dynamics 365 for Finance and Operations at its functional core. **Equipped to handle the most complex business processes in the nutrition supply chain, BESTMIX® ERP Suite provides a future-proof solution with native cloud capabilities.**

For every business, the streamlining of purchasing, sales, operations and finance processes is essential to growth. Businesses in the nutrition sector are no different – they can only thrive if their ERP system incorporates industry best practices. By combining BESTMIX® Software's industry expertise with the immense power of Microsoft Dynamics 365 for Finance and Operations, BESTMIX® ERP Suite streamlines the entire organizational workflow of the nutrition supply chain, including:

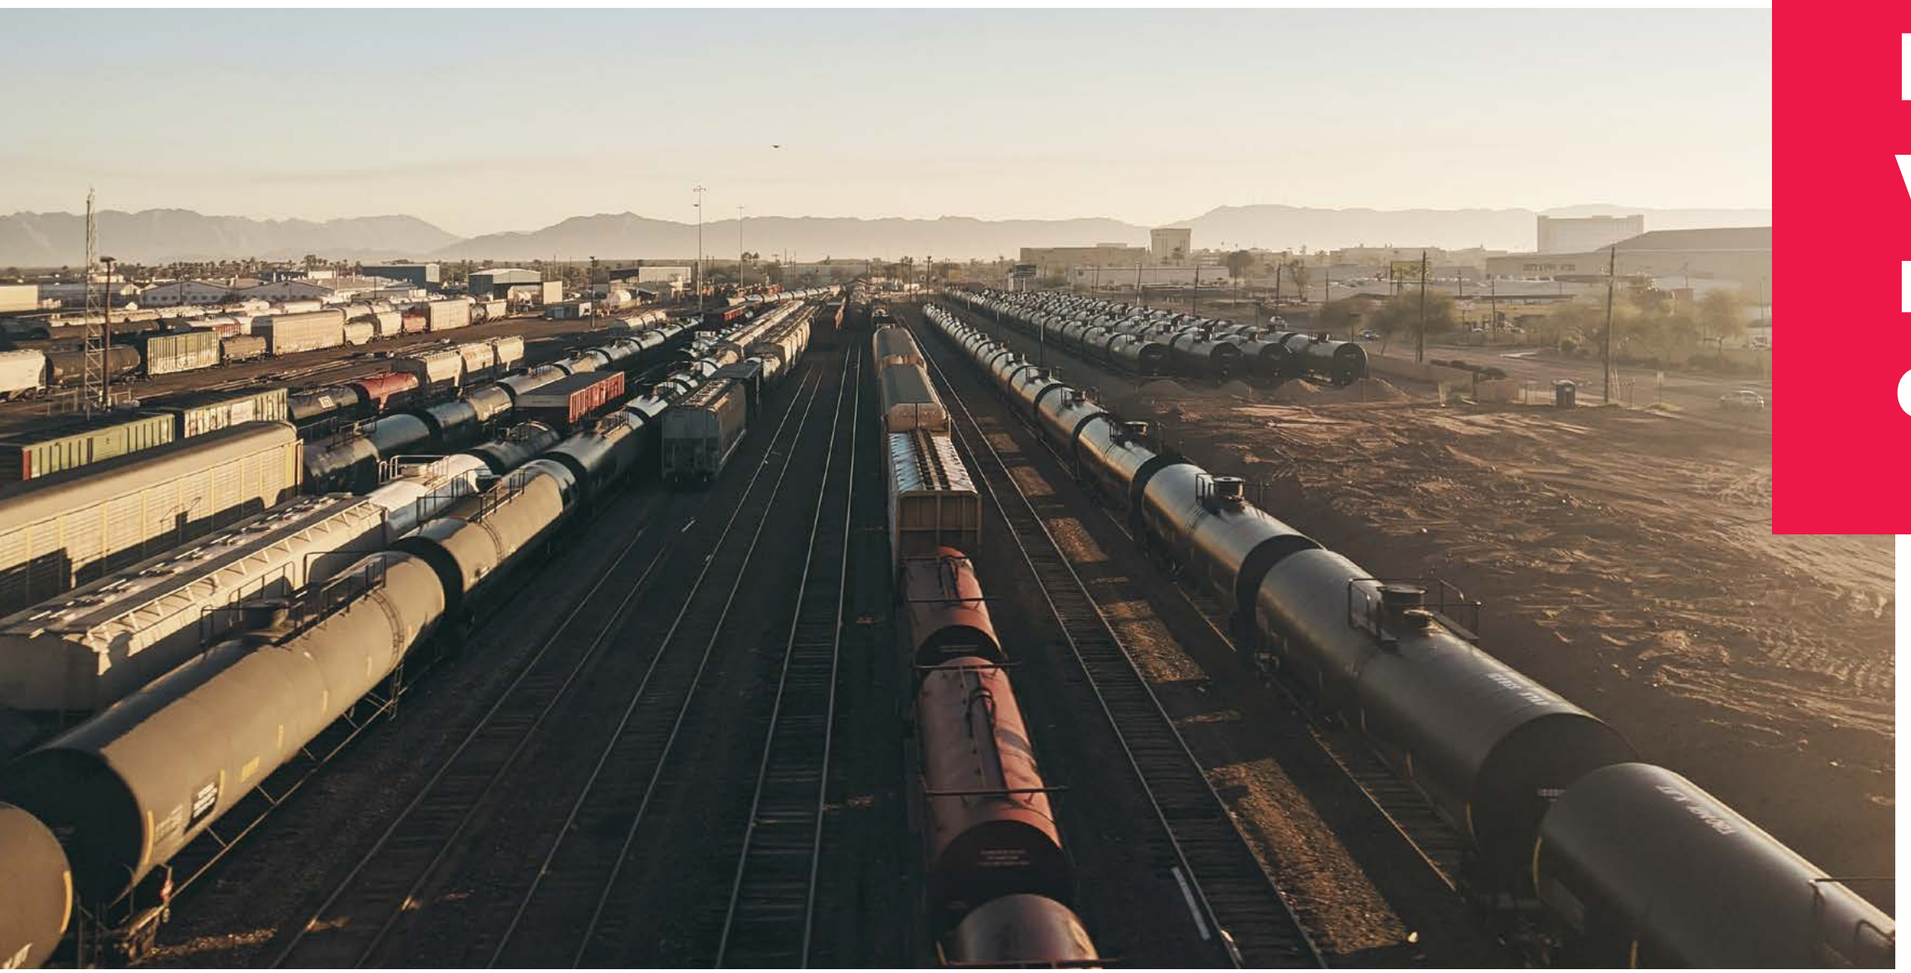

- Procurement and risk management
- Sales and purchase logistics
- Advanced sales discounts and charges
- Purchase landed cost calculation
- Production support
- Recipe and label management

BESTMIX® ERP Suite does even more to increase efficiency! It also seamlessly integrates with feed formulation and recipe management software (such as BESTMIX® Recipe Management), quality control software (such as BESTMIX® Quality Control), MES, EDI, weighbridges, etc.

How can BESTMIX® ERP Suite benefit your business?

You can rely on BESTMIX® ERP Suite to help you make better business decisions and reduce risks. BESTMIX® ERP Suite uses the power of Microsoft Dynamics 365 for Finance and Operations and benefits from BESTMIX® Software's extensive experience to streamline your purchasing, warehousing, sales and invoicing processes. BESTMIX® ERP Suite meets the demands of the competitive animal feed and human food sectors and empowers you to grow your business and succeed in marketplace.

Place your trust in BESTMIX® ERP Suite and take back full control of your business processes.

Make your workflows more efficient

Full control of your business processes

01 / More competitive raw material sourcing

BESTMIX® ERP Suite, in combination with BESTMIX® Recipe Management, provides real-time information on your purchase positions, stock levels and commodity prices. With our advanced purchase, contract management and risk management modules, you easily get online insight into every aspect of your ERP. You can use this 'out of the box' integration to perform rapid 'what if' scenarios that help you to reduce the largest cost to your business.

02 / Guarantee customer satisfaction

Improve your customer service by storing industry data (e.g. silos, prescriptions, feed additives) directly in your ERP. By integrating this data, you can speed up the order-entry process and ensure your customers receive their deliveries on time and at the best possible price. The advanced sales pricing module allows you to manage discount and charge systems that rely heavily on preset parameters directly in your ERP. With BESTMIX® ERP Suite you can offer your clients the best price every time and build lasting customer relationships.

03 / Improve overall productivity

Connect BESTMIX® ERP Suite to the world by using BESTMIX® Connect. With our industry-specific interfacing modules, you can easily create seamless integrations between every essential element of your business, such as MES, formulation, banking, EDI and quality control. By integrating these processes, you empower your team to work smarter, so they can achieve your business goals faster and with less human error.

04 / Reduce risks

Thanks to its embedded modules, BESTMIX® ERP Suite offers a straight path to safer and more efficient operations, so you can streamline procedures around the core elements of your business that carry the most risk, such as medicated feed handling, forward commodity contracting and customer-credit management. Fewer opportunities for error means better results for your business.

05 / The power of Microsoft

BESTMIX® ERP Suite combines BESTMIX® Software's industry expertise with Microsoft Dynamics 365 for Finance and Operations. You can be confident that BESTMIX® ERP Suite will always provide the most reliable and accurate industry data, while Microsoft is constantly improving the technology. Choose a true winning team, one that combines the best of both worlds.

What our customers say

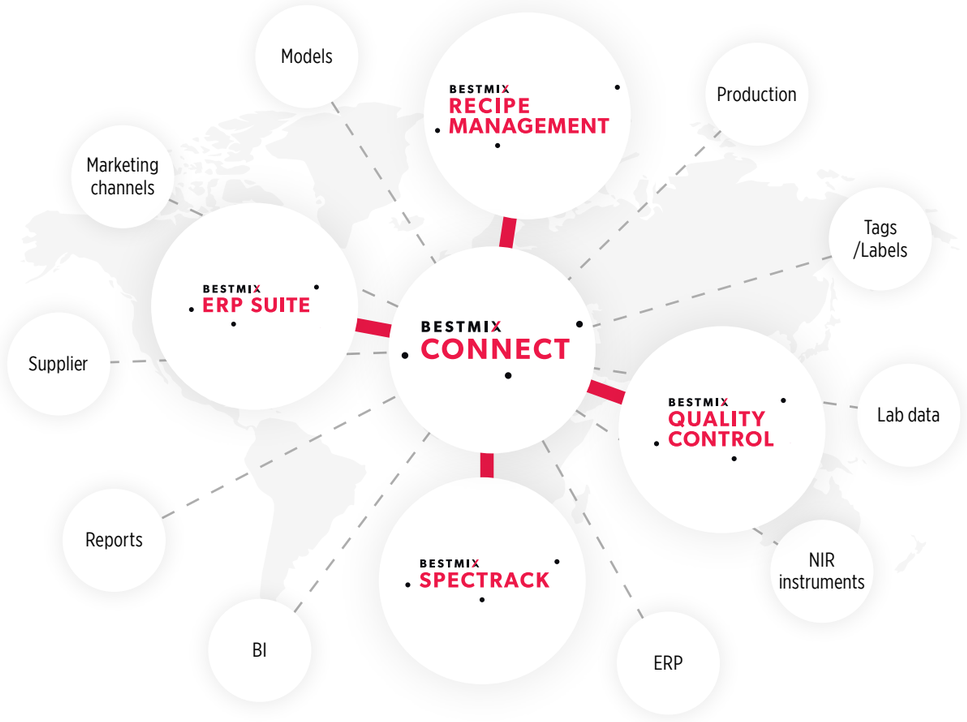

"We manage our entire logistical flow with BESTMIX® ERP Suite, from international contracts to factory reception, including the complete inventory and costing process. We chose BESTMIX® Software as a partner for their in-depth knowledge of our business and their professional consultancy."

"BESTMIX® Software's consultants have an excellent understanding of our feed industry; it's probably in their genes. They take a down-to-earth approach and showed great effort and dedication in managing our ERP project."

"When we picked BESTMIX® Software as a partner, we expected them to deliver sector knowledge, dedication and a solution that didn't need excessive customization. After the implementation process and a smooth go-live, I am happy to say that our expectations were met."

About BESTMIX® Software

At BESTMIX® Software, we're proud to offer industry-leading applications and expertise for clients across the globe. Continuous input from our users, almost 50 years of experience and state-of-the art technology guarantee innovative products that make a difference.

Our mission

Our mission, "Software feeding the future," highlights our dedication to not only deliver state-of-the-art solutions but also to be a reliable long-term partner for our customers. This is proven by our dedication to create specialized tools that can easily be integrated with one another. With stricter customer service and quality demands and a constant strain on the prices of raw materials, we are convinced now more than ever of the added value we can offer through our solutions and integrations.

Our strategy

We develop, sell and implement our software in one offering to enable your company to reach its goals. With our almost 50 years of experience in this business, we relish the opportunity to exceed your goals and to push your company further up the ladder of world-class performance.

Every day, a team of over 160 Agri- and IT-engineers, our seasoned industry specialists, creates and supports the world's most advanced systems for nutrition companies. With over 1000 companies and many thousands of users worldwide, our offering is extensive in every area – from our product to our consultancy to support during and after implementation. The result is a partnership that encompasses all departments of your organization.
